Experience

Visteon | Senior DevOps Engineer Nov 2026 – Present | Hubei

- Maintain agosense-based **B2B Jira integrations**, configuring data mappings and workflows to synchronize project and issue data.
- Diagnose synchronization failures and mapping conflicts; coordinate fixes with internal and partner teams.
- Maintain **CI/CD pipelines** for automated builds, testing, and deployment; troubleshoot failures to support project delivery.
- Support environment and release configuration; collaborate with developers to resolve deployment issues.

American Express | Backend Software Engineer May 2024 – Jan 2026 | CA

- Contributed to WMS backend development using **Java and Spring Boot**, MyBatis-Plus, MySQL, and Redis for multi-warehouse inventory.
- Implemented receipt, shipment, transfer, and stocktaking APIs; modeled SKU-level inventory and stock history for traceability.
- Protected inventory updates with Spring transactions, **MySQL row-level locks**, and stock validation to prevent inconsistent deductions.
- Improved inventory queries with SQL indexing and batch operations; cached product reference data using Redis.
- Supported backend deployment on AWS EC2/Linux and integrated S3 for product image storage.

One Community Global | Full Stack Software Engineer May 2023 – May 2024 | NY

- Built portfolio generation and profile management workflows using **React and Node.js**.
- Implemented group chat and collaboration interfaces using React and Mantine.
- Improved asynchronous data handling with Async/Await to support responsive and reliable user workflows.
